

# NIGHT OF THE ECLIPSE

A COSMIC JOURNEY FOR FAMILIES

presented by

**FREE  
FAMILY  
EVENT!**

**Thursday,  
March 13  
at 5:30 pm**

**BGSU  
Planetarium**

Families, do you want to learn about the science behind the upcoming lunar eclipse? Join **WBGU-PBS** for an engaging program to explore the wonders of the moon! Discover how the phases of the moon work and why it appears to change shape in the sky. Learn what causes a lunar eclipse and why the moon turns red during a total eclipse.

Each family will receive a free **STEM kit** and a **book** to continue the learning at home (while supplies last).

Don't miss this exciting opportunity to uncover the mysteries of our closest celestial neighbor!

**"Max Goes to the Moon,"** a program by the BGSU Planetarium and based on the children's book of the same name, will follow at 6:30 pm.
